

## Basic Electrical Appreciation Course

This two-week course is aimed at those requiring a basic understanding of electrical work, such as mechanical engineers requiring some basic cross-skill training.

The course covers both theory as well as some practical skills including:

- Basic electrical theory;
- Understanding Circuit Diagrams & basic circuit building;
- Termination of cables;
- Fault-finding on electrical equipment;
- Safe isolation of electrical equipment;
- Use of testing equipment;
- Operation of simple electrical components, such as motors, generators, circuit breakers and relays.

A SETA Certificate of attendance, listing the above course objectives, will be issued on completion.

### Course dates

Monday 16<sup>th</sup> – Friday 27<sup>th</sup> May 2011 at our First Avenue Training Centre (address below)

8.30am – 4pm: course price includes sandwich lunch

Price per person per week: £475 (SETA member companies: £450)

Please note, this course is subject to a minimum number of candidates; we will endeavour to notify any already booked candidates at least two weeks ahead if there is a danger of cancellation due to lack of numbers.

Please use the SETA Booking Form (available on our website) to book.
