

# HELENA- EXXONMOBIL INSTRUMENTATION APPRENTICE

## What does an average day look like for you?

First and foremost, there is no average day for me! Every day is different and brings a new and exciting challenge. Each day I'm learning new skills to take the next steps in my career.

## What personal qualities do you think are important to do your job?

You need to be a team player for sure. The saying 'there is no I in team' has never rung truer throughout this apprenticeship.

## What has been your personal highlight so far?

My personal highlight so far has been my first solo job out on site. This is when I realised how much I've learnt already!

## How did you first become interested in engineering?

I've been interested in Science and 'how things work' for as long as I can remember. As I got older I realised I wanted a hands on job and that's when I realised the apprenticeship was the best choice for me!

## Why did you choose to do an apprenticeship

I chose to do an apprenticeship because I personally learnt best hands on, I never really excelled through college because of this. But now I am in a job that I love and having fun everyday.
